Editor's Comment:

Upon careful perusal on the revised manuscript as suggested by the two reviewers, I hereby recommend the paper for further revision before publication considering the ff.

1. Discuss the normality test. If not performed, check the data if it is drawn from a normally distributed population to ascertain the use of parametric tests such as ANOVA, otherwise use the nonparametric Kruskal-Wallis.

2. Check the references if 75% new studies (over the last 3 to 5 years) and 25% more than 5 years old.
