<p>Optional/General comments</p>	<p>It is my opinion that this research work has been done very superficially and revision of a manuscript is required. Authors were not serious to find the relevant research work prior to this study. More literature is needed to support the study. Methods are not explained properly. Explanation of experimental work is not properly. There is not a single reference of the year 2021, 2022 and 2023. Authors didn't declare competing interests. Authors contributions are not included.</p>
