

Editor's Comment:

Paper is suitable for publication with these suggestions:

- 1 abstract is very precise, whatever treatment is taken in research, quote in the abstract.
2. The treatments include biofertilizers with GA3 but the amount and methods of application with time are lacking in the text. hence mention the amount and methods of application with time of biofertilizers.
3. The seedlings' maturity for transplanting should be clear in days, Hence conclude number of days required for transplanting.
