

Editor's Comment:

The authors have addressed all the comments and suggestions provided by all the reviewers. The revised manuscript is acceptable for publication with the following minor adjustments:

1. Duplicated keywords (same as the paper title) must be re-chosen.
2. All equations listed in the text must be numbered as "[1]", "[2]", etc.

If the source of the table data is generated from this study, there is no need to include "field survey" as the data source.
