### PART 1: Review Comments

Compulsory REVISION comments	<p>The authors should shorten the title. The abstract is good. The number of Keywords is 4 or 5 preferred. In the Introduction, the materials of the paper shown should be just up-date to 2022, and the authors also can look through the recent and important paper on this topic again, specially during 2019-2022. Besides, I strongly suggest that the authors add the following literature: DOI: 10.3389/FPSYG.2021.676945 DOI: 10.1108/BJM-09-2019-0335 In the Methodology section, it is good. Before Conclusion section, the authors should add Discussion section, the authors should explain results, derive specific theoretical, practical implications, and describe limitations. The section is missing. In the References section, we should strictly conduct as APA style. And their DOIs should be added.</p>
