

Review Form 1.6

Journal Name:	International Blood Research & Reviews
Manuscript Number:	Ms_IBRR_90636
Title of the Manuscript:	Evaluation of effectiveness of different regiments of centrifugation for a single-spin method of pure platelet-containing plasma preparation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalibr.com/index.php/IBRR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Why the most effective mode is 160g × 10 min, which allows achieving a platelet enrichment factor of about 1.71 at a platelet concentration of 483.6 ± 45.4 × 10⁹ /l, a platelet capture efficiency of 85, 7 ± 0.1%?</p> <p>Why were only 30 people selected?</p> <p>Are the measurements taken at the same ages for all people?</p>	
Minor REVISION comments	<p>Are people of the same type of environment or from different places?</p> <p>People's lifestyle is different or close in terms of weight and nutrition?</p> <p>Are they all of the same sex?</p>	
Optional/General comments	<p>Was the sedimentation factor calculated for all cases of blood?</p> <p>Was the statistical p_value calculated for all cases? If the number of people is multiple, i.e. 300 ten times, will the results change or not?</p>
