

### **Editor's Comment:**

The following corrections are recommended for this manuscript prior to publication acceptance:

1. Please explain "Rabi" season to the international readers.
2. The objective and purpose of conducting this experiment is missing in the abstract.
3. Besides providing the significant results, the abstract should also include the practical implications derived from this experiment, just like the similar sentences mentioned in the conclusion.
4. Again, a clear statement on the objective of performing this experiment is need in the introduction section also.
5. What is the unit used for TSS? Please specify!
6. What are "C.D.", "C.V."? In fact, all acronym names must be defined when first appear.
7. A thorough English-check and proof-check is highly recommended.
