PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	However, I have the following observations to make: - to review the numbering of the tables (1, 2 and 3), - more complex conclusions, not just the few ideas as you mentioned, - in table 1 and table 3, the values with three digits after the period confuse me. Are there actually thousands? can a number be waived?	
Minor REVISION comments	- Flow chart for preparation of guava fruit bar could be represented graphically in a more interesting way - to note the sources in the tables and in the figure - to explain before presenting the tables or after each table what the following terms mean: F-test, S.Ed(±), CD @ 5%	
Optional/General comments	The article respects the rigors of a scientific paper and is divided into the following sections: Abstract, Keywords, Introduction, Materials and Method, Results and Discussion, Conclusion and References.
