|-------------------------------------|--|---|
| <b>Compulsory</b> REVISION comments | <b>Need some grammatical revision</b>  |   |
| <b>Minor</b> REVISION comments      | Do journal formatting  |   |
| <b>Optional/General</b> comments    | The authors have studied <b>Determination of Effective Calcium Carbonate Equivalence of Rice Husk Ash</b> as soil amendments. On the percentage basis. They have stated that Rice Husk Ash has improved soil pH with the increasing amount of RHA and takes about 4 months to degrade in the soil and only then enhance the soil pH. Their results are very encouraging and will open many opportunities to farmers to maintain soil pH and finally the increase in the yield of the crop.<br>The data have been presented very beautifully and explained in detail. Their findings are worthy. The literature has been surveyed thoroughly. Graphs and tables are self-explanatory. Language is also good. Overall manuscript is suitable for publication in the general. |   |
