PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. From plant height, dry matter production, grain and straw yield of the transplanted rice comparing with the absolute control treatment, effect of T6 is also good enough. Analysing differences among T1 to T8, many distinct results may be achieved, which is my suggestion. 2. This study gives only one conclusion, which is regret to the huge work of authors'.	
Minor REVISION comments		
Optional/General comments
