PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This review exposes the scope and limitations of traditional cancer therapy, mainly oriented to the administration of cytotoxic drugs and to a lesser extent to the use of immunomodulators, drugs that affect angiogenesis, inhibit growth factors or signal transducers. In a context of unsatisfactory responses to antitumor chemotherapy, the authors highlight and endorse the available information, the alternative of applying wound healing metabolites that prevent the evolution of progenitor stem cells to cancer stem cells.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
