PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ul style="list-style-type: none">-Introduction: reference the initial approach (first paragraph).- Materials and Methods: revise the genus <i>Python</i>, since it is repeated, and the initial letter followed by the period (<i>P.</i>) is sufficient (first paragraph). Unify criteria in relation to space, or not in relation to the unit of measurement for temperature (second paragraph).- Results and Discussion: review Table. 1/highlighted in red, as it is too much; the correct one is the second one (first paragraph). Remove the period after Figure (second paragraph and highlighted in yellow and red). Revise the three genera highlighted in red (fourth paragraph), as it is incorrect to write the full name of these genera when they were already mentioned and stated previously.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
