Compulsory REVISION comments	The authors propose a blockchain-Enabled Radio Access Networks (B-RAN) modelling with review and theoretical study. In my opinion, this work is meaningful for blockchain network. There are some comments below which I recommend to give one chance to take a revision. A more comprehensive literature survey may be provided with blockchain-enabled tripartite anonymous identification trusted service provisioning in industrial IoT, IoTJ, distributed blockchain-based trusted multidomain collaboration for mobile edge computing in 5G and beyond, TII, blockchain-based hierarchical trust networking for JointCloud, IoTJ, blockchain-based secure distributed control for software defined optical networking. More results should analysed in more details.
