PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1) In line 3 under Methods category in abstract, remove endometriotic and non endometriotic from the brackets as they are your main groups. Make your group 1 as unilateral endometriotic cysts and group 2 as unilateral non endometriotic otherwise only the word unilateral doesn't make it clear to reader. 2) Under patients and methods sub section in the main article, again mention group 1 as endometriotic cyst instead of unilateral(endometriotic) and similarly for group 2. 3) In AMH levels under patients and methods sub section, months after surgery is mentioned. How many months is it? 4) Pls mention the units in all the tables. For eg- for age, mention it is age(yrs) and same goes for AMH, size of the cyst, etc 5) Why have you mentioned reduction in ovarian doppler RI in the tables when the theory mentions there is increase in the RI after cystectomy? 	
Minor REVISION comments	<ol style="list-style-type: none"> 1) Please divide the first sentence in introduction into two sentences.one on LOC and the other on AMH. It is long sentence with commas, making it difficult for the reader to comprehend. 2) Line 6,under Patients and method, sentence no. 2, please include 'was taken' after 'written and informed consent' 3) There is a negative sign before the number 86 in the reduction in AFC in table no 4 which needs to be removed 	
Optional/General comments	<ol style="list-style-type: none"> 1) 1) The title can be Effect of Laparoscopic cystectomy on endometriotic '<u>Versus</u>' non-endometriotic cyst rather than endometriotic '<u>and</u>' non endometriotic as u are comparing the two groups. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
