PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In this paper, the author(s) discussed the progress in the prognosis and treatment of Alzheimer's disease. I have the following comments: 1.This is a Review, the author(s) should appropriately add a Discussion section to give some discussions and a Conclusion section to summarize the paper. 2. There are many grammatical errors. For example, "Controversies on gene modification still exists.", "exists" should be "exist".	
Minor REVISION comments	There are several tiny issues: 1.In the paper, the appearance of the word "Alzheimer", the first letter should be capitalized; 2.There is an extra space between the word PROGNOSIS AND the word AND in the title; 3. Please use a consistent format for references; 4. Not sure what the underline in Health_Policy means?	
Optional/General comments
