Optional/General comments	<p>Its good research and well done.</p> <p>1- On farm experiments at least need to be repeated at least two years to make recommendation.</p> <p>2- There are many studies have been mentioned in the results and discussion part (25-51) but not in introduction. I was better if these studies were mentioned as a previous literature related to this study. As I see.</p> <p>2- The author (s) didn't mention the seed rating or number of plants per area, it was better to refer it.</p>
