### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The manuscript needs a clearer organization of the content. It discusses the value of ultrasound compared to fine-needle aspiration biopsy and molecular markers and the different results regarding the presence or absence of Hashimoto thyroiditis. Both are important aspects but should not be mixed. A table overview of the different findings of the studies, which were listed is needed. What are the bias of the different studies, mentioned in the Introduction? A review should not only list the findings but discuss them. The role of the different molecular markers should be mentioned.	
<b>Minor</b> REVISION comments	All abbreviations need to be given in full. The reference lists uses a variety of formats – this should be unified and according to the guidelines of the journal	
<b>Optional/General</b> comments
