### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>The manuscript contained high-quality prose, exceptional data, arguments, and conclusions, embedded firmly in existing literature.</b>	
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"> <li>• Under the study site and patient population – the author did not state the population, the total number of cases reviewed from both centers. I suggest that you state the target population and sample size.</li> <li>• From the second line to the last phrase under the ethical approval subheading, I suggest you move the paragraph to the materials and methods section.</li> <li>• The heading - Ethical approval, patients enrolments and follow-ups should be reviewed. We further suggest that Ethical Approval should be a stand-alone heading while Patients Enrolments and Follow-ups should also stand-alone.</li> <li>• The fourth main heading should be "investigations". Molecular investigations and molecular genetic studies should be subheadings under investigations.</li> </ul>	
<b>Optional/General</b> comments
