

Editor's Comment:

I think it needs some modification in the manuscript.

Amin in the Abstract is not clear. Need to make it simple.

There are few typing mistakes. Need to format carefully .

References are not properly written in the text.

Discussion is poor.

Table 1 is duplicated in the Table 1, 2 and 3. The same for the Table 2.

However, the research is well planned. **If the Authors modify accordingly, me decision is affirmative.**
