

Editor's Comment:

Prior to accepting this manuscript for publication, the authors must take good care of the following flaws:

1. Duplicated keyword (same as the paper title), such as “co-compost” must be re-chosen.
2. The literature review section must be re-written. Each citation must conform to the commonly used format which is “Author 1 and Author 2 (Year) found that”, or “(Author, year)”, or “Author et al. (year)”. “Author” in here stands for the last name only, no first name.
3. Every reference lists in the reference listing must be cited in the text.
4. No bullet is needed for the objective statement.
5. Please number all equations listed in the text.
6. Table data generated by the authors do not need to include the “SOURCE”.
7. Simplify the numbering system for all the tables, such as Table 1, 2 , 3....., not Table 1.1, 1.2, 2, 3....
8. Please use “and” instead of “&” throughout the entire text.
9. What is “F S” in the literature review section? All acronym names must be defined when first appear.
10. Many spacing errors have been detected. As such, therefore, a thorough proof-check is highly recommended.
