

### **Editor's Comment:**

This manuscript is acceptable for publication. However, the authors need to correct the following flaws:

1. Add "India" to the paper title.
2. Duplicated keywords (same as the paper title) must be re-chosen,
3. Typing error for "imporved".
4. The aim, methodology and results should be integrated in the abstract in one paragraph. Therefore, the abstract should be compacted and re-written.
5. Many punctuation errors such as "et al." instead of "et al.,".
6. "SD" in Table 1.1 should be defined in the text or in the footnote of the table.
7. The numbering system for all the tables should be simplified to just Table 1, Table 2, and so on.
8. The conclusion is too brief. It should be rewritten to include important result findings and practical implications and contribution derived from this study.
9. A thorough proof-check and English check is highly recommended.
