

Editor's Comment:

The revised manuscript is acceptable for publication after making the following corrections:

1. All acronym names such as "RBQ" must be defined when first appear.
2. Duplicated keywords (same as in the paper title) should be re-chosen.
3. When citing literature in the text, use "et al." with more than 2 authors. Besides, only authors' family names are needed.
4. Please number all equations listed in the text, even though there is only one.
5. Same variable name must be used in the formula as well as in the definitions.
6. The reference list must be arranged alphabetically.
7. Many spacing and English syntax errors have been detected. A thorough proof-check and English language check is highly recommended.
