PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In discussion, it is stated that "seronegative exposed partners also experience diminishing CD4+ T-cell counts as a result of HIV exposure" "Therefore, it may be appropriate to suggest that these people start taking ART in order to further protect them from the rising viraemia caused by untreated HIV infection. " Please explain how seronegative exposed partners have rising viremia and HIV infection. Please give reference for suggesting prophylactic ART to seronegative exposed partners.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
