PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There is a strong methodology error, inside the document they mention that they applied a guide and then consider that they are doing qualitative research and it is not, because qualitative research requires an analysis of content which is not. In general, what they present is a quantitative study, therefore it is recommended that they remove from the interior of the manuscript that they used a guide from which they do not present any results. If that part is removed then it is suggested that there is a transversal descriptive quantitative design. I considered that is not necessary that they give the explanation of why it is a transversal descriptive design, it is suggested that they remove that wording.	
Minor REVISION comments		
Optional/General comments
