PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript was well written and presented, which the main purpose was to evaluate the role of Hpg80 and Pro GRP in common type of carcinomas occurring globally which include lung, gastric, breasts, head neck and oral cancer. The authors reached their objectives in a scientifically correct way. They concluded that in light of the increasing interest in cancer diagnosis, Hpg80 and Pro GRP can be considered as a differentiating marker in screening and diagnosis of carcinomas.	
Minor REVISION comments	There are minor corrections to be made, detached in yellow directly in the manuscript.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
