PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. The logical structure, layout and expression of this paper are confused, and the readability is poor.2. For each test list, the number of specimens in each group should be given and how the test results were calculated. At the same time, the strength at three curing ages (7, 14 and 28 days) should also be given in order to understand the different strength growth characteristics.3. What are the curing conditions? Should be clear.4. The variables and units are incorrectly or incorrectly formatted.5. The mechanism of strength formation should be thoroughly analyzed.6. The literature review is not in-depth and the citation is not standard. On the other hand, the bibliography is repetitive.7. There are some mistakes on spelling and punctuation, as well as repeated abbreviations and duplicate names.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
