PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Check grammar and usage. Present aim of the study should be elaborated in the text. Experimental part for Qualitative Phytochemical Screening should be included. Formula for calculation of SI should be included in the experimental.	
Minor REVISION comments	The implication of this work to the field could be discussed more. The reference style should be corrected as per the guidelines.	
Optional/General comments	The positive results from these studies support the antiproliferative effect of the extracts. The studies are done well with appropriate replicates and positive and negative controls. It is a bit disappointing that the authors did not declare any competing interests, thus they do not seem to have patented their work, which would prevent the development towards commercialization.	

PART 2:
