PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The research is interesting and good of investigation but there is for manuscript improvement before publication.</p> <ol style="list-style-type: none"> Little background information is provided in the introduction The need for the research work is not well established in the introduction. The interpretation/discussion and conclusion are solely based on the authors' field data. How the water was classified based on the quality is not clear There are some grammatical errors that must be corrected. Generally the work does not give much information so to improve the quality of the manuscript, I suggest the following: <ol style="list-style-type: none"> Modify the introduction and add the enough information on the background and the need for this research. Present a clear means of water classification based on quality. 	
Minor REVISION comments		
Optional/General comments		

PART 2:
