

Editor's Comment:

Indeed the article is quite interesting. However, the revised version still requires much improvement prior to publication acceptance:

1. Add "India" to the paper title.
2. Duplicated keyword (same as in the paper title) should be re-chosen.
3. Specific and clear statements concerning the goal and objective to conduct this experiment is desperately needed in the introduction section.
4. What is PDA? In fact, all the acronym names used in this paper must be defined when first appear including "CD", "B.E. in the tables and figures.
5. Please number all equations listed in the text.
6. One of TS results is missing the proper unit "cm".
7. Please unify the use of "g" and "gm".
8. Why Figure 1 only appears in the results after Figures 2-5? Numbering of figures must be in sequence. The first figure should be Figure 1.
9. The diagram for ITS sequence included in the text is too tiny to see any detail.
10. Many English language errors have been detected. A thorough proof-check and English check is highly recommended.
