

Editor's Comment:

The revised manuscript is acceptable for publication. However, the authors need to improve the following flaws:

1. Duplicated keywords (same as the paper title) must be re-chosen. The number should be not less than 4.
2. The first table on hopper burn score should be numbered, captioned and referred to in the text.
3. All the current tables (I to V) must be referred to in the text. Besides, the numbering system may be change to Table 1, Table 2, Table 5.
4. Do not use "et al." in the reference list. All the authors' names must be all listed out.
5. A thorough proof-check and English check is highly recommended.
