PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In this sense, it would be more ethical for the author to increase the rate of his own comments and expressions. The author is advised to pay attention to the spaces given in the text and in the titles. It is meaningless for a research paper for the author to provide a separate title for a one-sentence description. Because it explains a parameter of the research.	
Minor REVISION comments		
Optional/General comments
