

Editor's Comment:

The revised manuscript has improved a lot on the English and the result presentation. It is acceptable for publication after correcting the following minor flaws:

1. Avoid using sub-headings in the abstract.
2. Duplicated keywords (same as the paper title) should be re-chosen.
3. Typing/spelling errors have been detected, such as "prsent". As such, a thorough proof-check is highly commended.
4. Please number all equations listed in the text.
