

Editor's Comment:

Major revision

- Lot of corrections are there which are mentioned in the article to be corrected compulsorily
- Uniform format should be followed while quoting the reference
- Materials and methods are not written clearly, should be written step by step procedure adopted for conducting the experiment
- Photograph shows plants in only one pot/ treatment and no replicated pots were seen in the picture
- Initial screening for salinity tolerance using the seeds by conducting germination test (Roll towel method) was not conducted
- A only small experiment has been conducted . Hence the paper submitted may be accepted only for short communication.
