

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_90171
Title of the Manuscript:	Identification of genetic divergence in okra genotypes [<i>Abelmoschus esculentus</i> (L.) Moench]
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The work is interesting and done on the basis of properly organized experimentation. The method of interpretation of the experimental data is adequate. The bibliography is cited in the text. The results could be presented more suggestively and in graphic form. The bibliography consulted is little. The discussions are brief and not compared to literature data. A comparative discussion would add value to the paper. Conclusions are not formulated.. Attention should be paid to the drafting, which must be according to the instructions.	
Minor REVISION comments	I consider it necessary, at least to formulate conclusions, if not to complete the discussion of the experimental results.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
