Compulsory REVISION comments	The authors have studied the Heritability and Character Association Among Yield Component Characters and Grain Yield in Rice (<i>Oryza sativa</i> L.). The approach to the problem and experimental studies are reasonable. However, the author needs to clarify the following aspects, <ul style="list-style-type: none">➤ The abstract and conclusion should be more quantitative.➤ The figure 1- need to format. X-axis and Y-axis have to label properly.➤ Author failed to explain the correlation of figures and tables.	
Minor REVISION comments	The technical aspects appear to be well done, although I suggest that the Pictorial representation of the experimental results with its corresponding data must be explained with literature reference will improve the value of the manuscript.	
Optional/General comments	The manuscript flows well and is quite readable. More comparison to the recent literature should be provided to demonstrate the main contributions of the present work.
