### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The research involved clinical examination of 556 school-age children, divided into 3 educational establishments, to evidence the presence of scalp pediculosis. Apparently the clinical examination was based on observation alone. The results presented are compatible with other studies present in the literature, reflecting the global public health problem regarding this infestation. it would be interesting to add what therapeutic or educational measures were provided to study participants and/or their families	
<b>Minor</b> REVISION comments	The bibliographic references must be reviewed and corrected, as they present spelling errors and references without dates	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
