### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>Add in the introduction references that describe the use of alcohol in young people, in addition to many being a reflection of parents consuming it as adults, the fact is based more on being able to socialize, the search to join groups of friends, acquaintances, new experiences, for living with age peers, the dynamics and energy that young people have, subliminal communication on TV, radio, social networks, etc. they also have a large influence in making it a recurrent and daily activity.</p> <p>The article is well elaborated and well founded, however, in the discussion it would be valuable to add some neurophysiological aspects, as commented in the introduction on hippocampal atrophy.</p> <p>Give an explanation about the increase in women, if there is any neurological component or the hormones could influence, etc.</p>	
<b>Optional/General</b> comments	<p>The article is based on the problem of depression and alcohol consumption in university students in Nigeria, which is a global problem in different continents, which makes it valuable from its conception.</p>
