PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">The abstract need to be formulated, it does not contain some main items as subjects and methods, also, some words are often repeated among it.The estimation of the population of the study depends on a very old reference from 2006, and therefore there is a bias in the estimated sample size.The study methodology seems devoid of its content, as it does not express in any way the basics of writing the methodology. It did not contain the type of study, how to choose the sample size, questionnaire, study time and inclusion and exclusion criteria. It is in dire need of rewriting.On what basis was the sample size chosen, it does not represent the studied population.	
Minor REVISION comments	<ul style="list-style-type: none">There are more grammatical and writing errors that need to be reformulated.The objectives need to be more focus and more specific, for example, describing the socio economic characteristics is not considering a specific objective.Most references of this manuscript are very old, and need to be updated as much change had occurred regarding this field.	
Optional/General comments	<ul style="list-style-type: none">There is repeating of the content of most of points that mentioned in the manuscript.There is a need to know about value that can be given for science by this research.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
