### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"><li>1. Thank you for doing this hard work. In general, the experimental part seemed good to me, however there is a lack of data on the preclinical part of the laboratory and medical devices used for sampling and quantitative analysis of minerals, PPT and albumin, it is not mentioned anywhere and should have a leading role in the materials and methods section</li><li>2. The discussion could be better, try to end the paragraph with its conclusion, some have no end and the reader cannot make their interpretation.</li><li>3. It is necessary to put some kind of consecutive or number of the approval of the ethics committee and the informed consent of the parents of the children, for the taking of samples and the use of their results, in case it is needed in the future</li></ol>	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
