Manuscript Number:	Ms_JAMMR_90540
Title of the Manuscript:	OmpA and Bap genes as Virulence Genes Involved in Biofilm Formation of Acinetobacter Baumannii
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Improve the abstract: I suggest remove topics, keep the text running and between 250-300 words. Improve the Material and Methods: the text is too long, could narrow down the topics and put a more succinct explanation without failing to explain all the steps. Improve the Discussion: improve the writing of the text making it more robust; I also suggest correcting the presence of many paragraphs starting with "in the present work" and " in the present study".	
Optional/General comments	Minor Revision The manuscript is very good, but it need to improve on several points. The authors needs to review and improve all the points mentioned above for his article to continue in the publication process	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
