PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. AST, ALT, creatinine, and BUN parameters should be described in sufficient details in materials & methods or neglected from manuscript2. There are no results about special accounts on history & clinical examination in paragraph (2. Methods: A & B), so either neglected from methods or showed their measurements in results.	
Minor REVISION comments	<ol style="list-style-type: none">1. Data for certain variable either represented in table or figure (not via two types of illustration)2. It is not necessary to put symbols in tables that explain the type of statistics used for analysis, just P value is enough.	
Optional/General comments	<ol style="list-style-type: none">1. Since CBC parameters are not discussed in your manuscript, I prefer to be neglected2. Conventionally, it is preferred to give the normal range of each physiological parameters to confirm your significant differences and to be at safety side when you make your conclusion	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
