

Review Form 1.6

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_90798
Title of the Manuscript:	Diagnostic efficacy of cervical lesions by cytology and colposcopy.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Thanks for invitation. Regarding cervical cancer screening, the clinical guidelines are well defined in the sense that the association of the Pap test with the HPV test is recommended. Depending on the association of the lesions, colposcopy with biopsy is performed or not Let's not forget that it is a screening aimed at a large population aged 24-65, which also involves high costs. That's why the methods must be simple and effective (detection of injuries with the lowest possible costs)	
Minor REVISION comments	I recommend the association of HPV examination with Pap test +/- colposcopy, according to the guidelines	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
