Manuscript Number:	Ms_JOCAMR_90384
Title of the Manuscript:	Assessment Of The Effect Of Cocos nucifera (Coconut) Milk On Testosterone Level And Testes Of Male Albino Rats
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljocamr.com/index.php/JOCAMR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The statement "Average serum testosterone levels lower than control can be attributed to stress experienced by rats during use and treatment period" may be contradictory to the statement "all the animals were handled in accordance to Institutional regulations approved for the care and use of animals for scientific research by University of Nigeria"	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> It would be more appropriate to indicate the ethical committee report number in the article.
