PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The weight of animals in inclusion criteria is mentioned as 150-200 gm whereas in next paragraph of experiment it has been mentioned that, "average weight of 140 g was procured" As per the pharmacological guidelines- The duration of acute toxicity is 14 days, sub-acute toxicity is 14-28 days and chronic toxicity is long term exposure. But in the reported study 21 days is mentioned as acute which is not as per the accepted scientific facts.	
Minor REVISION comments	The spelling of 'la casera tomtom' is wrongly written at some places and need to correct. No uniformity is maintained in the using name of codine substitute in title and body of manuscript and graph of results. Avoid the variation of names. Even the name of experimental animal is not used uniformly.	
Optional/General comments
