PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Authors are recommended to search for bibliographic references beyond just websites. Using only this in a study to be published can take away the critical nature of the work, in addition to not honoring studies by other colleagues with the same theme.</p> <p>The second and third paragraphs contained in the "conclusion" topic can be relocated to the "discussion" topic. There, it is believed, that they can be better explored from the information that the authors inserted at each point.</p> <p>The "results" topic should contain more information than just writing summarized in words than the table shows.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:
