PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Accept the paper.	
Minor REVISION comments		
Optional/General comments	Very nice discussion on the use of traditional plants as another source of anti-T2DM drugs. However, I would like to recommend to the researchers to further characterized the secondary metabolites by using NMR, well in the next study, I believe with this we can know if these plants samples contain novel active metabolites that could be a potential drug. Congratulations to the authors.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
