

Review Form 1.6

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_90345
Title of the Manuscript:	Impact of aerobics exercise training on the pulse oximetry of pregnant women in a Nigerian Teaching Hospital
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljsrr.com/index.php/JSRR/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Abstract: kindly make the whole sentence to explain the use of pulse oximetry in this study. The use of pulse oximetry can be explained in the method or discussion, in my opinion, it's too specific if we explain it here.</p> <p>Introduction: Lethal for exercise has some serious identification, the author should look for references that show data on lethal exercise, maybe in a special journal of sports medicine. If somebody does the exercise for a long time, whether he get the risk of the exercise, or he got benefit of the training. Please learn about acute and chronic adaptation of training. Maybe the statement is not complete, so we have a misunderstanding here</p> <p>Method:</p> <ul style="list-style-type: none"> No need to write the whole sample formula in the article. Please make it simple, for exam No need to write the whole sample formula in the article. Please make it simple, for example, just mention the reference that the author has used, the important number, and the result of the total sample. This is an experimental study, using aerobic exercise. Please add the inclusion and exclusion criteria that relation to exercise, for example, the condition of musculoskeletal function Please use table or diagram, or picture for describing the training protocol. <p>Learn more about Exercise adaptation and Exercise intensity according to ACSM (American College of Sports Medicine).</p>	
Minor REVISION comments	<p>Table 1, there is no data in the decision column.</p> <p>Table 2, Pre post data, usually in a similar line, or find experimental column and control column should written site by site.</p>	
Optional/General comments	<p>Writing articles is a little different from writing scientific papers. Articles are made simple but informative and detailed. There is a style in writing articles, in contrast to scientific papers which tends to be a little rigid because it follows the existing regulations.</p> <p>Most of the references are old but still related. Please quote the most recent so that readers also get the latest information. If it's possible, you need to look for references for the years 2022 - 2018.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
