

Editor's Comment:

This revised manuscript needs to take good care of the following flaws prior to be accepted for publication:

1. Add "India" to the paper title.
2. Duplicated keywords (same as the paper title) must be re-chosen.
3. The objective of this study must be mentioned clearly towards the end of the introduction section.
4. Formulae for mean percentage should be replaced in the form of clear statements.
5. Name of the villages must be capitalized.
6. Caption for Table 1 should include questions, not just answers. Besides, the "mean" row is repeated.
7. As mentioned by one of the reviewers, the study results have not been adequately discussed. Please include more descriptive on the characteristics of the results obtained in Table 1.
8. Practical implications from this study have not been included in the abstract as well as in the conclusion section.
9. Many spacing and English syntax errors have been detected. Therefore, a thorough proof check and English check is highly recommended.

Listing for references must be alphabetically ordered.
