

Editor's Comment:

After reading both the reviewers comments and the manuscript the decision is to Accept after the following recommendation are addressed on the manuscript:

- The sample needs to be more specified (ages, academic habilitations, job,)
- Please translate the terms that are still in Spanish
- Re-organize tables – too many tables and some of them can be aggregated
- Probably, and because the metric qualities of instruments are insufficient, authors are invited OR to do new analysis (e.g., content validity indexes, temporal stability, exploratory factorial analysis) OR just sum up the main scores in one single paragraph.
