### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>How were chosen those 30 non-participating community leaders? Are they leaders or not? In Table 1, how can "reforestation &amp; research" to help mitigate the risks of volcanic eruption? Please, explain.</p> <p>There are some gases/ash/heat/infrasound sensors, seismometers, high resolution cameras near volcano? Explain what means "community leaders of communities". I am thinking if in those 105 leaders there are some volcanologists, meteorologists. Is that volcano monitored by satellite?</p> <p>There is a data base regarding the activity of volcano? If the risks are so great, why wasn't the issue of carrying out simulations in some major institutions like hospitals, schools, power plants, etc. in the event of a natural disaster? An awareness campaign is one, a real simulation is something different. People' behaviour is different in a disaster if they know what they have to do, step by step.</p>	
<b>Minor</b> REVISION comments	<p>In section 2, DILG abbreviation appears before you wrote the meaning of it: "Department of Interior and Local Government".</p> <p>I do not understand what mean "BDRRMC", "CBDRRM".</p> <p>Please write what it means the terms from first line of each table (Yes, f, rank, %). An ordinary reader does not understand.</p> <p>What means the word "purok"?</p>	
<b>Optional/General</b> comments
